

## Jellyfields - A New Management Plan 2020-2030

### Why a new plan?

Jellyfields is a 2.53 Ha area of wet Alder woodland with open areas either side of the Walditch Brook. Ownership of Jellyfields will soon transfer from Dorset Council to Bridport Town Council. The Town Council is looking to produce a new management plan for Jellyfields to define and prioritise practical action to enhance the area for wildlife as well as promoting quiet enjoyment of the nature reserve.

### How will the new management plan be developed?

Community consultation is essential to gathering information about what currently works well and what ideas for improvements need to be considered in developing a management plan for the next ten years. Over the next five months the Town Council will be working with Bothenhampton & Walditch Parish Council and the wider community to produce a new management plan for Jellyfields Local Nature Reserve.

What	When	How
Collecting information about Jellyfields; wildlife surveys, current recreational uses and ideas for improvements	May – June 2020	Postcard/ website and emails An open site meeting <b>tbc</b>
A draft plan for community consultation	July – August 2020	Document available online and on local display
Final Plan adopted by Town & Parish Council	September 2020	Document and summary published online
